

EXHIBITOR CAMPSITE INFORMATION

LOCATION: Campsites will be situated on, or adjacent to, the show grounds.

ARRIVAL: You may be placed on your campsite Wednesday, Thursday, or Friday between 9:00am-5:00pm

ELECTRICAL: All campsites are supplied with a 30 AMP service during the show. You are welcome to run your generators keeping in mind your immediate neighbors.

WATER: You should be hooked up to a permanent water supply. In the event we can't do that, our mobile water delivery vehicle will fill your tank as needed. **(Water is a precious commodity in the desert! PLEASE SHOW UP FULL!)**

DUMPING OF HOLDING TANKS: Our mobile sewage system will come by to dump your holding tanks on your scheduled pumping day. You will receive your Exhibitor Pump Schedule when you check in at the show office. Upon being camped, you will be given a colored card that will identify which days you will be pumped (Please see your pumping schedule to see what days each color is pumped). PLEASE make sure you leave your sewer access door unlocked AT ALL TIMES as you will be skipped if our staff cannot access you sewer.

IMPORTANT! PLEASE NOTE! SHOW UP WITH YOUR HOLDING TANKS EMPTY!

PROPANE SERVICE: Mobile propane service is not available during the show. Unless you will be able to pull out during the show to re-fill, expect to make it on the propane in your RV upon arrival.

FIRE SAFETY: Please be careful in regards to BBQ's, space heaters or any other source of ignition. Avoid stacking any flammable objects (boxes, ect) near your water heater door or any other source of heat or flame.

SHOWERS: There are no shower facilities on the show grounds.

PETS: All pets must be kept inside your RV during the show or inside an enclosure if outdoors. Please make sure that you clean up after your pet immediately during the show. You may keep "people friendly" pets in your booth as long as they are on a leash.

NOTE: USE SERGE PROTECTORS! Management is not responsible for any electrical damage to equipment or vehicles during show.
